

Jorel del Portal.

SPEAKER KIT

Jorel del Portal

Systems engineer · Critical-platform architecture

Short bio (to introduce at the event)

Jorel del Portal is a systems engineer specialized in architecture, integration, resilience and observability of critical platforms. He designs systems, builds products and documents real engineering decisions.

Medium bio (for program or event site)

Jorel del Portal is a systems engineer with over 14 years in the banking and financial sector, specialized in architecture, integration, resilience and observability of critical platforms. He founded Del Portal Technologies, the studio where he turns architecture decisions into real products, and documents his judgment in Decision Logs, Fundamentals and a technical newsletter. He gives technical talks and sessions in Spanish and English.

Talk topics

Resilient systems architecture

Resilience patterns, redundancy and fault tolerance.

A system in the green can be completely stalled

Observability: metrics, logs, traces and business signals.

Troubleshooting & diagnosis

Mental models to reach root cause in critical incidents.

High availability

Active/Passive, Active/Active, DR and always-on platforms.

B2B integration & file transfer

Secure architectures with IBM Sterling.

Cloud & hybrid architectures

Decisions and patterns on AWS, Azure and IBM Cloud.

Formats

Keynote (30-60 min) · Technical workshop (2-4 h) · Panel / Roundtable · Corporate training · Virtual / Hybrid

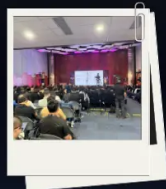

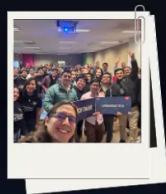

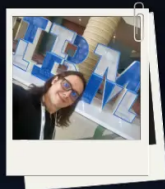

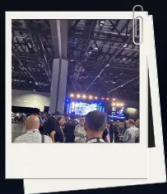

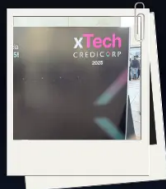

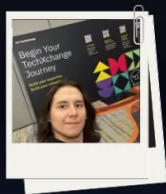

Languages and availability

Spanish (native) and English. In-person in any region, with prior arrangements; virtual without restriction.
